MY SHIBA INU

INTRODUCTION

He is your friend, your partner, your defender, your dog. You are his life, his love, his leader.

He will be yours, faithful and true, to the last beat of his heart. You owe it to him to be worthy of such devotion.

– Agnes Repplier.

WHY MY SHIBA INU?

My Shiba Inu is the token for the SHIBA Metaverse, currently on the Binance Smart Chain Blockchain. While technically the original token name is 'My Shiba Inu,' the community has referred to it as the 'SHIBA Project'.

SHIBA OVERVIEW

My Shiba Inu is an Bep 20 token. All tokens are in circulation, with the initial liquidity burned. This means that no additional My Shiba tokens can be minted into circulation. Also, as My Shiba Inu was 100% Free Launched, all tokens have always been publicly tradable.

ECOSYSTEM

The Shiba Inu will be used as a medium of exchange in the marketplace of our products, where users will be able to buy, sell and exchange assets and NFTs. Once these NFTs are purchased, they will interact with the metaverse or games in the metaverse in a variety of ways and more.

The My Shiba Inu token itself is unique in its simplicity. Unfortunately, many cryptocurrencies have complex, confusing, volatile, and often misleading mechanics written into their contracts. My Shiba Inu is as simple and transparent as possible: No taxes on any transactions: people get as much My Shiba Inu as they pay and are not penalized for trading. No developer wallet: no automatic sending of transaction amount to anyone or anywhere No built-in burn mechanism or mint: My shiba inu will never automatically become inflationary or deflationary. All tokens are in circulation: some projects use the process of vesting rights to "lock" part of the tokens for a certain time. Simply put, circulating supply can never be increased higher than it is today. These factors ensure that the My Shiba Inu token itself is safe, transparent, sustainable and fair. My Shiba Inu will become the currency of the My Shiba Inu metaverse and (like all cryptocurrencies) can be bought and sold with regular fiat currencies to meet the real needs of people.

TAKE YOUR CRYPTO PHILOSOPHY OF MY SHIBA INU

WHAT IS MY SHIBA INU

My Shiba Inu is currently the only truly decentralized Binance project, and it is seeking to merge the concept of the internet V3.0 with a cryptocurrency-based economy

The central philosophy of My Shiba Inu is the belief that projects can be done fairer, more sustainably, and in a way that can benefit everyone involved. No large corporation or company is looking to extract personal data from the users for advertising or maximize profits for yearly reports. My Shiba Inu simply wants people to have fun, interact with each other freely, have access to opportunities that lead to financial freedom, and work towards the next stage in the evolution of the internet and online interaction. We have seen poor outcomes when projects are developed in greedy, unsustainable, or deceptive ways. We want to create something that rises above all these methods.

My Shiba Inu will be empowering, transparent, fun, healthy, and fair.

My Shiba Inu believes strongly in decentralization, holding this value at the core of everything it does.

Decentralization gives everyone equal opportunity to be involved and utilize their strengths to help a project grow and the freedom to decide how.

There is a social responsibility to provide tools and resources in the virtual space to create a fun and adaptive environment for individuals to thrive and monetize, no matter who or where they are.

WE PROVIDE BUSINESS SOLUTIONS

GET TO KNOW US!

My Shiba Inu. It is an exciting new concept for the future of our digital world. However, defining the cryptoverse can be challenging as it can encompass anything we currently do online, but in a simulated 3D digital environment, taking advantage of the digital connectivity we have rapidly developed in the last years and publish our ideas.

The My Shiba Inu will combine online experiences in a fluid and connected way that accurately reflects the human experience. To do this, we will use tools in the technical world to represent, and improve upon, what we encounter and experience in the physical world.

SHIBA INTERNET

Immense virtual worlds, augmented reality, virtual reality, and the internet will be used as a shared virtual 3D space connecting to all the social, gaming, shopping, research, education, and financial programs we use – all interconnected and interacting in a digital ecosystem.

The metaverse will be the hub of it all, a universe in itself. Internet V3.0 are a relatively new concept and technology, and there are currently very few that exist beyond the research phase.

My Shiba Inu is currently the only truly decentralized Binance project, and it is seeking to merge the concept of the internet V3.0 with a cryptocurrency-based economy.

It is based in a free-crypto-themed setting for an enhanced experience that taps into what makes humans unique; a drive and desire to explore, learn and go beyond.

CRYPTO VISION

Decentralized networks (cryptocurrency) provide an unparalleled degree of assurance and security with finances in response to a decline in trust towards institutions. It appears inevitable that crypto may play the most important role in the emergence of the metaverse. My Shiba Inu aims to anticipate this coming evolution revolution by combining these two concepts, building an ethical, decentralized, entertaining, and innovative project

PUPPIES FARM

While Decentralized Finance (DeFi) continues to make waves and maintain its parabolic growth, **yield farming remains a popular tool** for generating returns from long-term holdings. For the uninitiated, yield farming is simply the act of staking your assets into a platform to earn yield.
